**Press Release 6/18/2024**

### **Universal Service Fund Projects 2024**

**St. George's, Grenada, June 18, 2024** - The National Telecommunications Regulatory Commission (NTRC) would like to inform the public that the following projects were selected to receive funding under the Universal Service Fund for the 2023/2024 funding cycle.

#### **1. ICTs at New Life Organization**

- **Location:** Mt. St. Ervans and Palmiste
- **Description:** ICT equipment and wireless internet access to computer labs

#### **2. Smart Classrooms (Pilot)**

- **Location:** Selected Secondary and primary schools in Grenada
- **Description:** Installation of ICT, AR and VR equipment and software to augment teaching and learning in schools

Please note further that the following project is currently under review:

#### **1. Wireless Internet Access at Public Locations**

- **Location:** Playing fields, Concord Waterfall, broadband connectivity to Mountain Road - Concord
- **Description:** installation of wireless internet and infrastructure in public locations

The NTRC would like to take the opportunity to extend thanks and appreciation to the applicants who submitted proposals to be considered for funding. The selection process was highly competitive, with numerous applications demonstrating strong potential to enhance service delivery and impact. While many proposals showcased commendable qualities and innovative approaches, only the top three were selected to secure funding this cycle.

The NTRC would work with applicants in the upcoming weeks to refine and develop the projects in detail to ensure comprehensive projects that align with the current and future needs of the targeted groups. Projects selected to receive funding under the USF will be tendered to eligible bidders in accordance with the Universal Service Fund Regulations. The successful bidder will then be awarded a Contract to execute the project.
